National Communications Committee

Generative Artificial Intelligence (AI) Usage Policy

Order of the Arrow | Scouting America - National Committee

1. Core Principle
Members of the Order of the Arrow remain the primary creators and decision-makers.
Artificial Intelligence may assist the creative workflow, but human accountability is mandatory.

2. Permitted AI Applications:
- Brainstorming headlines, campaign angles, and outlining draft concepts
- Research assistance, structural feedback, and initial data organization
- Grammar proofreading, editorial checks, and meeting note summaries
- (All outputs must be rigorously fact-checked by human editors before use)

3. Prohibited AI Applications:
- Creating final publication-ready content or synthetic imagery for official OA platforms
- Substantial edits or rewrites that replace the author’s individual voice
- Publishing AI-authored text as an official National Committee product
- Human judgment decisions: content approvals, personnel matters, or policy interpretation
